HAS HIS FINAL HOUR.**

Synopsis

XY is the series that showed a new way of doing fiction on Mexican television, with the innovativeness of its theme and the quality of its realization. Starring Juan Carlos Barreto, Eduardo Arroyuelo and Claudio Lafarga, among others, it shows throughout its three seasons, the drama that several characters live while writing in a magazine and making it the most read, the most publicized and therefore, reflecting in its numbers, the vicissitudes of the contemporary man.

In the second season of XY, the magazine makes the inevitable leap to electronic media with new alliances and positions. Roberto Lanzagorta arrives, an entrepreneur from the north of the country, a charismatic leader, who is now the new head of Artemio and his team. Along with him, new members and stories join XY's writing.

Throughout the previous two seasons, XY showed different situations, contexts and attitudes of the modern man, always trying to answer questions like How manly are you? Or What to do to become a man? Now it's the time to complete the exam that started a long time ago.
